PERFECT FOR FEEDING ALL KOI:

APPLICATION:

Grower is a complete floating grower feed with a higher protein level to promote growth. The right protein / energy (P/E) ratio not only gives a good growth and muscle development but also helps to keep the right shape.

You can use Grower to grow show koi to large sizes.

* Feed 2-4 times per day depending on fish size and water temperature and no more than the koi eat within 5 minutes. Remove uneaten feed from the pond in case of overfeeding. At water temperatures below 10 °C koi have a reduced appetite and slow digestion, therefore feed accordingly. Don't feed koi if the water temperature is below 5 °C.
